WINDOW MODE'S "SOLAR SCRIM" SHADING SYSTEM ACCENTUATES VIEWS FROM LUXURY MANHATTAN APARTMENT

Window Modes, Ltd., one of the design industry's leading resources in window treatments, has combined the finest European solar screen technology with the most innovative variety of shading systems to create "**Solar Scrim**", a unique window treatment for sun control in any setting.

"**Solar Scrim**" significantly reduces radiant heat, ultra violet rays and glare while allowing a clear, subdued view to the outside. Durable, fade resistant, fire resistant, dimensionally stable, and, due to an anti-static treatment, "**Solar Scrim**" products are virtually maintenance free.

Available by the yard, Window Modes custom fabricates to precise specifications for any solar shading requirement, such as greenhouses and sunrooms. "**Solar Scrim**" is available as roller shades with clutch lift mechanism, or motorized as removable fixed screens for interior or exterior applications such as solar romans, vertical blinds or panel tracks.

Shown are Solar Scrim shades as they are used to enhance a dramatic New York skyline view in a luxury apartment designed by **Michael DaBoin/Intrinsic Interiors**.

Window Modes, Ltd. is headquartered in Mount Vernon, New York with a showroom in the D&D Building, 979 Third Avenue, New York City. They are also represented in Design Centers across the country.
